DILS "LIVE!" LIMITED 12" VINYL RE-ISSUE
35TH ANNIVERSARY EXPANDED EDITION W/ UN-RELEASED 1978 MABUHAY GARDENS SET ON BONUS CD. - ARRIVES NOW!!!

Porterhouse is thrilled to announce our re-issue of the long play recording "Live!" from West Coast punk rock pioneers the Dils. We have resurected the LP from the original 1/4" analogue master tapes and given the audio a complete re-mastering. Included inside the package is a Compact Disc featuring a never released live set, recorded at the Mabuhay Gardens in San Francisco on March 20, 1978 at the 'New Wave Against Black Lung' Miner's Benefit show. The collection totals 24 tracks recorded between the years 1977-1980. The re-issue includes a download. However, the song "What Goes On" (Velvet Underground) only appears on the CD.

We have completely revamped the artwork for this aniversary package, tapping famed Canadian punk chronologist Bev Davies for the main jacket image. A completely new insert containing the original copy is sprinkled with never seen photos and a fresh paragraph from then band manager Peter Urban who primes the Mabuhay Gardens set. This package is limited to 500 copies only.

The expanded collection also makes its worldwide digital debut, finally becoming available at Apple Music, Spotify and the other usual suspects. The Porterhouse Records 'Live!" 35th Anniversary Expanded Edition Re-Issue is available now.
